

MEHMET FATİH AKÇAY

Makine Mühendisi

Hakkımda

As a recent graduate of Istanbul University-Cerrahpaşa Mechanical Engineering Department, I am interested in integrating engineering principles into production, automation and design processes. Throughout my university life, I focused on thermal systems, material science and manufacturing technologies and had the opportunity to apply theoretical knowledge in the field with my internship experiences. I adopt the understanding of continuous learning and developing innovative solutions in engineering. I aim to add value to the sector with my problem-solving ability, analytical thinking skills and teamwork aptitude.
