Hakkımda

I graduated from Kocaeli University, Bachelor's degree, Civil Engineering department in June 2021.I achieved an academic success during my school term and my grade average is 3.1 out of a 4 system.I was entitled to become an honor student in the 2017-2018 academic year for outstanding achievement and for being an active role in our departmental club.For my profession; I developed myself in these programs by participating in training programs such as AutoCAD, Sap2000, IdeCAD, Revit and 3DSMax.Afterwards, I improved myself on these programs by using these programs in places where I had internships. In our university's Transportation class, I set up a team of 10 people and led this project in line with the plans given to us by our professor.At the end of our project,We presented our project in front of the class and it was evaluated completely by our teacher with full marks. I know that my profession is renewed every day and I follow these innovations closely.By following seminars and trainings related to my profession, I learn information that can make myself effective in business life.I took part in one of the biggest projects in the city where I had my first internship experience.Later, in the business center project where I did my voluntary internship, I experienced many things that need to be experienced about civil engineering and improved myself.I am working as Project Engineer at Intek Kalıp Iskele. In my work; In addition to designing projects on Autocad, I do formwork analysis with Tipos, structural analysis with Sap2000 and prepare proposals for designed projects. I can communicate easily and take an active role in team work. I believe the power of innovation and change, therefore i try to improve myself everyday.

İş Deneyimi

- **İntek Kalıp ve İskele**
01.10.2023 - 24.08.2025
- **Polatay İnşaat**
01.02.2023 - 25.08.2023
- **UMD Dizayn&Danışmanlık**
11.11.2022 - 31.01.2023
- **GaLa Bau GmbH**
01.01.2022 - 30.09.2022

Eğitim

- **Kocaeli Üniversitesi** - Lisans
(01.09.2016 - 21.06.2021)
