HAZAL DOĞAN

Yazılım Mühendisi

Hakkımda

As a versatile and proactive software engineer, I have developed my skills in various areas including software testing, front-end development, and artificial intelligence. I started my career as a Software Test Engineer, where I automated test cases and managed testing processes effectively. Three months later, I moved to Front-end Development using Flutter and Dart to build modern applications and release user-centric features. My journey also includes experience in web design, where I built dynamic websites using WordPress, HTML, and Bootstrap. I also gained experience in Artificial Intelligence and Image Processing, and developed a project that segmented X-ray lung images with a 96% success rate by optimizing hyperparameters through the Grid Search algorithm. This work, along with my collaboration with the Quality department during CMMI audits, deepened my understanding of producing software documentation that complies with international standards. I am passionate about leveraging technology to solve complex problems and continuously improving my skills to deliver impactful solutions.

İş Deneyimi

- **Artiox Kripto Varlık Alın Satım Platformu A.Ş.**
  04.02.2023 - 24.08.2025
- **Akgün Technology**
  04.06.2021 - 14.01.2022
- **Birpa Bilişim**
  17.01.2022 - 18.02.2022

Eğitim

- **Atilim University** - Lisans
  (18.09.2017 - 04.06.2022)

Seminerler & Sertifikalar

Seminer veya sertifika bilgisi eklenmemiş.
